# THERE SHALL BE

## NO HUNGER HERE

Since the dawn of history, hunger and the fear of hunger have driven men to war. And nations have had to have food to defend themselves. No nation has ever been so secure in its supply of food and fiber as America is today. Never has a nation been given such a guarantee of abundance as that assured by the American farmer.

America's bins and warehouses are full to overflowing with food and fiber, for America has the Ever-Normal Granary that stores the abundance of fat years against any possible scarcity in lean years. The Ever-Normal Granary is on millions of farms, in thousands of roadside bins and in countless elevators and warehouses.

Wheat and corn and cotton to feed and clothe the multitudes are there. Three times the normal supply of wheat has been put into this storage, and added to the new crop it gives us more than a billion bushels for the coming year---half again as much as we would normally consume.

The Ever Normal Granary for corn holds three times the usual carryover; and the corn means pork and lard, beef and mutton, milk and butter, poultry and eggs.

If there were a cotton crop failure, we should not have a scarcity of cotton because the Ever Normal Granary has more than a full year's supply.

The American farmer is the most abundant producer on earth and he now has the most efficient storage system on earth. America's bursting bins of food and fiber are the farmers' reply to the bursting shells of Europe. Come what may, the American farmer with his Ever Normal Granary is ready for the defense.
